WHO AM I?

I am an embedded software engineer working across the full stack, from Linux build systems up to the operator-facing UI. With a background in game development and tool creation, I enjoy being close to the hardware. I am known for my calm and level-headed attitude under pressure, consistently looking to learn and improve my skills.

CORE SKILLS

Languages C++ / C# / Python
Embedded Yocto / Rauc / Cross-compilation / Raspberry Pi
Protocols CAN Bus / MQTT / REST / WebRTC
Tools Qt / Avalonia / Docker / Git / CMake

EXPERIENCE

- 9/2025 – now **Embedded Software Engineer** **Invisto**
Sole developer on my projects, working directly with client engineers and an external design studio: operator interfaces in C++/Qt, Yocto Linux images and Rauc over-the-air updates on industrial hardware.
C++ / Qt / Yocto / Rauc / CAN Bus
- 2/2025 – 6/2025 **Tool Developer** **Cyborn**
Internship
Created internal tools and editors to support game development pipelines, working with Unreal Engine and cross-functional teams.
Unreal Engine / C++ / C# / Python / Jenkins
- 7/2023 – 8/2023 **Web Developer** **Paragon Netherlands and Belgium**
Summer job
Developed an internal tool for managing and planning employee leave and absences, built on an MVC architecture with SQL and ASP.NET.
C# / ASP.NET / SQL / MVC

EDUCATION

- 2022 – 2025 **Bachelor's in Digital Arts and Entertainment | Game Development** **Howest**
DAE taught me a lot about C++ and game development, but more importantly it taught me how to learn new things on my own, which is a skill I have been using a lot during my internship and personal projects.
C++ / Unreal Engine / Git
- 2021 – 2022 **Industrial Engineering** **U Hasselt • KU Leuven**
Where my interest in working close to hardware began. Owned the electronics, trajectory calculations and Arduino firmware for a team-built precision car launcher — plus a Bluetooth control app — which took the best overall score in its contest.
MATLAB / Java / Python / Electronics / Arduino

LANGUAGES

Dutch - native
English - fluent
French - intermediate
Japanese - rudimentary
German - rudimentary
